

DASA® 26/13 FERTILIZER CE

Composition, properties, appearance:

DASA® 26/13 is a sulfur-containing granular nitrogen fertilizer. Nitrogen is in the form of ammonium and nitrate and sulfur is in the form of water-soluble sulfate. The granular product has a pink to brown color and the surface is treated with a coating agent.

Technical specification:

| | |
|----------------------------------|-----------------|
| total nitrogen content (N) | |
| ammoniacal nitrogen content | 26% by weight |
| nitric nitrogen content | 18.5% by weight |
| water-soluble sulfur (S) content | 7.5% by weight |
| | 13% by weight |

Particle size distribution:

| | |
|---|---------------|
| particle content from 2 to 5 mm min. particle | 90% by weight |
| content less than 1 mm max. | 1% by weight |
| particle content over 10 mm | 0% by weight |

Application:

The fertilizer is used in the spring for basic fertilization or for additional regenerative fertilization during the vegetation to enrich the nutrition of the plant with nitrogen and sulfur. It is especially suitable for fertilizing oilseeds, fodder plants, roots, bulbous roots and cereals.

Reference dosage in l per ha:

| PRODUCT | DOSAGE OF FERTILIZER FOR 1 YEAR |
|-----------------------------|---------------------------------|
| rape | 300 – 400 |
| Sunflower | 200 – 300 |
| potatoes, sugar beet | 200 – 250 |
| cereals | 200 – 250 |
| cabbage vegetables | 170 – 200 |
| bulbous and bean vegetables | 150 – 200 |

The recommended doses are informative; you must respect the nutrient intake of the soil, the expected yield and the possibilities to combine fertilizer with other types of fertilizers.

Packing:

DASA® 26/13 is packed in polyethylene bags with 25 kg of fertilizer or delivered in bulk in large bags with 1,000 kg of fertilizer.

Storage:

Packaged fertilizer must be stored in the original intact and closed containers, separate from food, beverages, feed, pesticides and their containers. Bulk fertilizer should be stored in separate and marked boxes, in dry storage, well ventilated and closed.
